

Dairy farming

This moderation report covers activities for the period July - September 2023.

Since June 2022, **six new or revised programmes have been endorsed** by Muka Tangata for use in the Dairy Farming industry.

In the period between July and September 2023, we called for **51 ākonga (learner) assessment samples** from **six providers** delivering standards in the industry. These were desk-based moderated.

Our moderators agreed with 76% of the providers assessment judgements. This is in line with the all-of sector verification rate of 77% for this period, and signals clearly that overall, ākonga are being assessed to the industry standard.

Of the 18 ākonga Māori samples moderated, our moderators agreed with 16 assessor decisions. There was one provider who did not meet the standard, however this was due more to their systems and accessibility of results than materials or assessor decisions. The Quality Assurance and Enhancement team have been working closely with this provider and will be visiting them in 2024.

Over this period, we have carried out onsite and online hui whakapūmau enhancement visits with four Dairy industry providers to observe delivery and assessment of Dairy industry standards.

Over the year, we facilitated **22 professional development online seminars** for providers around best practice assessment, meeting programme endorsement considerations, and te ao Māori.
